

Detailed maps of the more complex waterholes/camps

- Park roads
- Ministry of Environment and Tourism roads
- New roads have been made around the waterholes - these should be used in preference to the old roads, as the old roads pass very close to the waterholes, and there is a danger of scaring the game away from the water holes.
- Omurambas/fossil river beds
- Campsites
- Ablution Blocks
- Office Buildings
- Camp Bungalows/Huts
- Game Hides
- Water Holes

39km (130min) through deep sand to tarred road at Katere (main road) Katere-Rundu 111km Katere-Divundu 89km

The shortest route from Tsumkwe to Divundu is 281km. There is no fuel at Tsumkwe! You should have fuel for 500 normal kilometres as consumption doubles in the sand.

Coordinates are given in UTM metric format, WGS84 datum to be set on GPS.

10 kms

Copyright Tsumkwe Lodge 2004

Travelling with two vehicles is advisable, especially north of Dussi

Carry two spare tyres, a tyre repair kit, pump, a wooden plank to put underneath jack in the sand, a shovel, spare battery, 20 liters of water.

Beware! In the rainy season this road through the omuramba becomes impassable.

The solar pumps at the boreholes sometimes malfunction or sometimes the taps are tampered with. Report at the nearest camp when water is not being pumped into the water hole. You might notice elephants standing around not drinking. The tap on the pipe going to the water hole might be closed. To obtain water in an emergency this tap can be closed and the other one opened, but afterwards the tap to the water hole must be opened again.
